Experience

Datadog   Senior Product Designer   09/2024 - Present

                     Product Designer   11/2021 - 09/2024

Design lead for Access, where I've designed scalable systems for managing consumption of content and data across all products of the Datadog platform

Lead project direction in particularly ambiguous product spaces, handling designs across fidelity levels and iterating quickly to deliver on project needs

Owned Datadog Teams 0-1 through major releases, providing relevance, access and billing clarity to 15000+ large and medium organizations

Ship AI based front-end code when speed and iteration is most important

Bloomberg LP   Interaction Designer   10/2019 - 11/2021

Designed and ran research across News, Charts and Geospatial Data on the Bloomberg Terminal, serving all of Bloomberg's 330,000+ professional users

Defined the way users search for securities within and annotate their charts on the Terminal

Invesco   UX Designer   07/2017 - 10/2019

Designed custom internal systems for Invesco's portfolio management and sales organizations

Generated annual time savings worth >$550,000 by solving for salesperson lead generation and organization needs

Education

University of Washington   Class of 2017

Bachelor of Science in Informatics
